

Anshik Mantri

Backend Engineer | Software Development Engineer | AI/ML Engineer

📞 7023805961 ✉ anshikmantri@gmail.com 🔗 linkedin.com/in/anshikmantri 🌐 github.com/anshikmantri77 📍 Bengaluru,

Technical Skills

Languages: Python, SQL, Java, JavaScript, TypeScript, C++, Golang

Backend: FastAPI, Spring Boot, Node.js, Express.js, REST APIs, Microservices, JWT, OAuth2, API Gateway, Rate Limiting, JusPay, System Design

Frontend: React.js, Streamlit, HTML, CSS, RESTful Integration

AI/ML: LangChain, FAISS, RAG Pipelines, Sentence Transformers, Multi-Agent Systems, Transformers, Scikit-learn, TensorFlow, PyTorch, Keras, Hugging Face, Ollama, ChromaDB, Prompt Engineering

Databases: MySQL, PostgreSQL, MongoDB, Redis, Aerospike, ChromaDB, MariaDB, NoSQL

Cloud & DevOps: AWS (CCP Certified), Azure, Docker, Kubernetes, CI/CD, Jenkins, DataDog, Linux

Data & Tools: Pandas, NumPy, Power BI, ETL Pipelines, Apache Spark, Hadoop, Git, Postman, Jira

Professional Experience

Backend Developer Intern | PharmEasy | Bengaluru, India

Sep 2025 – Present

- **B2B API Suite:** Developed and enhanced B2B backend APIs (orders, reports, auth, catalog) with validation, filtering, pagination, and guard-based authentication across distributed microservices for scalable partner integrations.
- **Rate Limiting & Locking:** Implemented Redis-based rate limiting and concurrent request locking for Products API, eliminating duplicate requests and enforcing per-minute quotas; resolved production bugs via Redis key lifecycle restructuring.
- **Security (IDOR Fix):** Eliminated critical IDOR vulnerability by enforcing JWT-based ownership validation and HTTP 403 access control, aligning with OWASP best practices across order management APIs.

AI/ML Engineer | Rofolin | Remote

Aug 2025 – Sep 2025

- **Multi-Agent Platform:** Built a Python-based AI automation system with specialized LLM agents (research, trend analysis, content generation) orchestrated via central controller, automating end-to-end marketing campaigns.
- **RAG Pipeline:** Engineered production-grade RAG pipeline using FAISS vector search and Sentence Transformers, backed by FastAPI service with real-time analytics dashboard for context-aware LLM content generation at scale.

Data Analyst Intern | HexaWealth | Remote

Aug 2024 – Jan 2025

- **ETL & EDA:** Built ETL pipelines ingesting multi-source financial data into MySQL; performed EDA on NIFTY/BSE 500 equities covering sector returns, volatility trends, and drawdown patterns across 500+ instruments.
- **Risk Analytics & ML:** Developed risk classification engine using SQL window functions and Python (Sharpe ratio, volatility, return quartiles); trained Random Forest, XGBoost, and Logistic Regression models achieving high classification accuracy.

Key Projects

Local-Vault — Privacy-First AI Chatbot 🗝️

Python | RAG | ChromaDB | Ollama | FastAPI | Streamlit | LangChain | Vector Search

- Built full-stack AI chatbot with RAG pipeline supporting document ingestion (PDF, Word, CSV, images) using OCR, semantic chunking, metadata tagging, and ChromaDB vector search for context-aware LLM responses.
- Developed Streamlit UI with FastAPI backend; integrated Ollama for private on-device LLM inference with conversation memory and personalized responses from user-uploaded data.

StockSense AI — Real-Time Stock Analysis Platform 📈

Python | MySQL | NLP | Scikit-learn | LangChain | Gemini LLM | Plotly | React

- Integrated LangChain and Gemini LLM as finance-domain AI assistant with TextBlob sentiment analysis, custom stock screener (P/E, ROE, Debt/Equity), and Random Forest/XGBoost pipelines on NIFTY/BSE 500.
- Built AI-driven portfolio builder with SIP/lump-sum projections and Plotly/Altair dashboards tracking volatility, drawdown, sector allocation, and benchmark deviation in real time.

Education

B.Tech, Computer Science Engineering | Vellore Institute of Technology, Chennai | 2021 – 2025 | GPA: 8.1/10

Coursework: DSA, DBMS, Computer Networks, OS, OOP, Data Visualization, Distributed Systems, Statistics & Probability

Certifications & Achievements

- AWS Certified Cloud Practitioner | Data Science, ML, Deep Learning & NLP Bootcamp — Udemy | Data Engineering, Apache Spark & Hadoop, Python for Data Science — IBM/Coursera
- Mindcare Hackathon — Top 5 Finalist (200+ teams) | Amazon ML Hackathon — Participant
